Suggested File Organization:

```
prompt-machine/
├── docs/
│   ├── 00-NEW-master-index.md
│   ├── 01-NEW-mvp-roadmap.md
│   ├── 02-NEW-version-1-0-0.md ★ (START HERE)
│   ├── 03-NEW-version-1-1-0.md
│   ├── 04-NEW-version-strategy.md
│   ├── 12-claude-code-guide.md
│   ├── 15-prompt-builder.md
│   └── 16-troubleshooting.md
├── setup/
│   ├── 02-database-schema.sql
│   └── 03-server-setup.sh
└── README.md (create this with "Start with docs/00-NEW-master-index.md")
```

You're Ready!

With these 10 files, you have everything needed to:

- Build an MVP in 2 weeks
- Launch and start making money
- Scale based on real user feedback
- Reference advanced features when needed

Final Encouragement:

You've put in a lot of work planning this. Now it's time to BUILD!

The difference between a good idea and a successful business is SHIPPING. You have all the blueprints. Time to make it real!

Remember: Version 1.0.0 doesn't need to be perfect. It needs to EXIST.

Good luck! You've got this!
